Awareness Centre Safe.si

As an Awareness Centre, SAFE.SI raises awareness of its five target groups about safe and responsible use of the internet and new technologies. The project's aim is to provide children, teenagers, parents, teachers and social workers with knowledge and tools for guiding, empowering and helping children and teenagers in the digital world. The Slovenian Awareness Centre Safe.si has positioned itself as the key resource and knowledge base for children's use of the internet and mobile technologies in Slovenia.

Part of the Safer internet project is Hotline Spletno oko and Helpline Tom telefon. Hotline Spletno oko allows internet users to anonymously report cases of hate speech and child sexual abuse images they come across online. One of the main objectives of the Helpline Tom telefon is to provide the possibility for a confidential and anonymous conversation about problems, hardships, including issues related to the use of the internet and mobile devices for young people on a daily basis.

Website Safe.si

Awareness Centre's website www.safe.si provides exhaustive information regarding internet safety for all project's target groups. Children, teenagers, parents and teachers all have separate sections on the website that provide information, tips, materials, videos designed especially for the respective target group. On the website, we offer digital versions of all SAFE.SI printed materials and also useful links and materials of other organizations.

Security and privacy setting guides for social networks

Guides offer practical information how to correctly set settings for privacy and security on most popular social networks and mobile apps. Guides are in pdf format that can be used on different devices or printed.

A handbook for schools on how to handle online incidents

The handbook titled "Problems of web safety in schools" contains practical tips how to handle incidents connected with internet use and how to set appropriate acceptable use policies. It is suitable for school administration. The handbook is available for download on safe.si website.

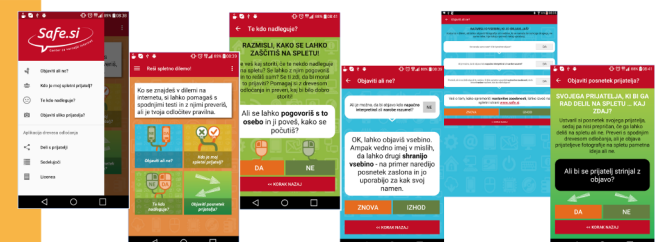

Help for parents in the vortex of new technologies: Better internet for children

In this handbook, parents can find tips and advice on all the important issues of bringing-up their children in the world of new technologies. The topics of privacy online, social networks, gaming, illegal and harmful content, risky online behavior, excessive use of technology and use of mobile devices are presented in a short but comprehensive manner for parents to gain all important information in this 32-page A5 format booklet which is also available online.

Mobile app: Solve internet dilemma

App for mobile phones and tablets helps users to decide if they should post something online or publish pictures on social networks. It can help to think about "friends" on socal networks, that users do not know and help in cases of cyberbullying. The App is available for devices with Android (via Google Play) and with iOS (via App Store).

UP2US

Slovenian adaptation of Irish #Up2Us Anti-Bullying Kit, which was created by Webwise. The kit aims to empower young people to tackle cyberbullying in their communities. This resource contains ten lesson plans on cyberbullying and is designed to be used with 12 to 15 years old pupils.
