Prenova spletnega mesta Safe.si 2021
Zbiranje ponudb za prenovo spletnega mesta Safe.si

Datum objave: 2.8.2021
Rok za oddajo ponudb: 20.8.2021 – RAZPIS JE PODALJŠAN DO 14.9.2021

Fakulteta za družbene vede Univerze v Ljubljani v okviru projekta Center za varnejši internet zbira ponudbe za grafično prenovo in tehnično nadgraditev spletnega mesta Safe.si (www.safe.si), ki obsega:

- izris nove podobe spletnega mesta,
- nadgradnjo CMS Drupal v skladu z novo podobo.
- namestitev na strežnik, gostovanje in vzdrževanje spletnega mesta safe.si in spletnega mesta otroci.safe.si.

Pred začetkom dela bomo posredovali kopijo spletnega mesta safe.si in spletnega mesta otroci.safe.si – vse programske in vsebinske datoteke ter kopijo baze.

Podrobne zahteve so opisane v nadaljevanju.

Spletno mesto Safe.si – nekaj informacij

Safe.si, ki je del projekta Center za varnejši internet, od leta 2005 deluje kot nacionalna točka osveščanja otrok in najstnikov o varni rabi interneta in mobilnih naprav. Naše aktivnosti so namenjene štirim ciljnim skupinam: otrokom, mladostnikom, staršem in strokovnim delavcem (učiteljem, socialnim, mladinskim delavcem ...).

Glavni informacijski vir in pomemben element delovanja je **spletno mesto Safe.si** (www.safe.si), ki vsebuje številne informacije za vse ciljne skupine. V letu 2021 je spletno mesto do konca maja imelo v povprečju mesečno 25.745 obiskov (sej) in 65.274 prikazov strani.

Spletno mesto se redno polni z novimi vsebinami. Vsak teden objavimo nekaj novic, redno dopolnjujemo nasvete, dodajamo nove videe in različna e-gradiva. RSS z novimi vsebinami uporabljajo številne šole, ki na svojih spletnih straneh na ta način prikazujejo novice s Safe.si

Spletno mesto je bilo v preteklosti enkrat tarča DDoS napada – šlo je za koordiniran napad v času dneva varne rabe interneta pred nekaj leti, ko so bila napadena tudi spletna mesta nekaterih naših partnerjev v EU. Zaradi tega je na obstoječem strežniku blokiran dostop uporabnikom iz IP številk, ki pripadajo Aziji (vključujoč Rusijo). Od blokade spletno mesto ni bilo več tarča kakršnegakoli napada, ki bi ga zaznali.

Spletno mesto otroci.safe.si (https://otroci.safe.si/) je samostojno spletno mesto namenjeno otrokom. Spletno mesto se ne bo prenovilo, treba pa bo urediti prenos na nov strežnik in gostovanje.

1. Grafična prenova in nadgradnja spletnega mesta

a) Grafična prenova spletnega mesta in nadgradnja

Spletno mesto prednostno nagovarja najstnike od 11. leta naprej, starše, učitelje in strokovne delavce. Grafična podoba spletnega mesta mora primarno ustrezati najstnikom, vendar biti primerna tudi za starše in učitelje, torej starejše od 25 let.

Pri zadnji prenovi spletnega mesta je bil glavni poudarek na oblikovanju vsebinske strukture in njena prilagoditev uporabi na telefonih. Izdelana podoba je bila enostavna in špartanska.

Namen prenove oz. izdelave nove grafične podobe je narediti spletno mesto všečno in privlačno za uporabo vsem ciljnim skupinam.

Splošno:

- vodilna barva je rdeča barva logotipa Safe.si : #cf0a2c;
- podoba se mora dinamično prilagajati širini zaslona;
- podoba mora ustrezati zahtevam WCAG 2.1 level AA standarda za slabovidne;
- grafična podoba mora biti prilagojena tako, da je uporaba spletnega mesta na mobilnih telefonih čim bolj enostavna.

Tipografija:

- predlagana velikost črk v besedilu glavne vsebine (p): 18px oz. prilagojeno izbrani pisavi,
- naslovi: h1, h2, h3, h4, h5, h6;
- povezave v besedilu naj bodo jasno vidne in podčrtane;

Obvezni elementi

Glava strani mora vsebovati:

- logotip Safe.si in napis »Točka osveščanja o varni rabi interneta in mobilnih naprav za otroke, najstnike, starše in učitelje«, ki se na ožjih zaslonih skrajša na »Točka osveščanja o varni rabi interneta in mobilnih naprav«
- iskalnik;
- povezavo na Središče za pomoč, ki jo simbolizira ustrezen znak.

Meni je predviden vrstično. Na dovolj širokih zaslonih naj bodo povezave 1. nivoja izpisane v vrstici, drugje se uporablja hamburger/accordion rešitvijo.

Noga strani mora vsebovati:

- povezave na Tom telefon, Spletno oko in Naročilo novic,
- logotipe s povezavami na družabne kanale, z možnostjo dodajanja novih,
- sekundarni meni s štirimi povezavami,
- besedilo o odgovornosti,
- povezavi na pravno obvestilo in obvestilo o piškotkih,
- besedilo o avtorskih pravicah,
- obvezne logotipe: financerji, partnerji.

Wireframe

Sestavni del povpraševanja so sheme strani (wireframe), ki so dostopne na:

https://www.dropbox.com/s/jqs25n2zncpy6qk/Wireframe%20Safe21.zip?dl=0

Izrisane so za široke zaslone. Pri majhnih zaslonih je treba upoštevati logično razporeditev elementov, ki se zlagajo po vrsti (prioriteta pada od leve proti desno in nato navzdol po vrsticah).

V primeru, da obstaja boljša rešitev postavitve elementov posamezne strani, se je mogoče o novem predlogu pogovoriti.

Predvidena velikost posameznih elementov ni zavezujoča (npr. velikost okvirjev, slik, razmikov med posameznimi elementi itd.).

Prva stran

Prva stran je, glede na obstoječo, spremenjena. V zgornjem delu so tri izpostavljene vsebine v obliki sliderja. Pod njim so tri izpostavljene vsebine s sličico, naslovom in besedilom. Izpostavljen je lahko katerikoli tip vsebine razen tip vsebine »napotek«. Sledijo povezave na glavne vsebine, ki se ne spreminjajo, in noga strani z vsemi elementi, ki se ponavljajo na vseh drugih straneh.

Novice

Nad pregledom novic so predvideni ključniki, ki jih bralec izbere, da se mu sortirajo novice. Izbira lahko po ključnikih za ciljno publiko (Novice za:), ki jih je 5 (Otroci, Najstniki, Starši, Učitelji, Strokovni delavci) in po vsebinskih ključnikih, ki jih je več kot 15 (Nasilje, Prekomerna raba, Družabna omrežja, Dogodki, Zaščita pred virusi itd.).

Videi

Pregled videov ni predviden za izris kot tipska stran, saj je predviden enak videz kot za 1. in 2. nivo. Edina razlika je, da se nad prikaz videov uvede prikaz ključnikov po dveh različnih slovarjih: ciljna publika in vsebina. Ključnikov za ciljno publiko je 5 (Otroci, Najstniki, Starši, Učitelji, Strokovni delavci), za vsebino pa 12 (Družabna omrežja, Vzgoja za internet, Kreativna uporaba, Zasebnost, E-zlorabe, Nasilje …). Ta prikaz ključnikov naj bi bil grafično enak kot pri prikazu ključnikov pri novicah. V nasprotnem primeru naj se izriše prikaz ključnikov za videe.

Pri prikazu posameznega videa je predvideno, da je pod videom ključnik, ki mu video pripada s povezavo na prikaz vseh videov pod tem ključnikom.

WCAG 2.1 level AA standard

Podoba naj bo usklajena z zahtevami za slabovidne, ki jih morajo izpolnjevati spletna mesta javnega sektorja v skladu z direktivo EU. Spletno mesto mora temu standardu ustrezati tako na velikih, kot majhnih zaslonih.

b) Nadgradnja CMS Drupal

Obstoječe stanje

Spletno mesto www.safe.si je bilo v zdajšnji obliki postavljeno leta 2016. Na CMS Drupal 7, za grafično podobo je uporabljena močno prilagojena tema AT Commerce.
